

## **INVEST IN AN EXTRA SET OF EYES**

Closed Circuit Television (CCTV) is about more than added security. We design video management systems to help you operate with greater efficiency and profitability by reducing shrinkage and increasing worker productivity. You can view and manage multiple locations remotely and even integrate our systems with your POS.

We specialize in systems designed for convenience stores, property management, retail, automotive, healthcare, QSR, bars and restaurants, as well as any business or facility.

### ***It starts with identifying your goals.***

Security? Loss Prevention? Operations Management? Liability Protection? Waste Reduction? We help you identify the right system to meet your specific needs and budget, then offer comprehensive design and installation services.

### ***Our systems offer several key benefits:***

- **Remote access and monitoring of multiple locations**
- POS system integration for restaurant and retail
- Simple video storage and retrieval
- Easily upgrade or replace existing camera systems
- Analytics included - not offered by the competitor

**"Our vision is to provide the highest quality digital video solutions, personalized professional service and the best value available in the industry."**

Since 1998, Eclipse CCTV and Access Control products have raised the bar for innovation in the security industry. As a manufacturer of CCTV surveillance cameras, Eclipse offers a diverse selection of state-of-the-art business and residential security products. Our products have been guarding the property and enhancing the safety of clients, employees, guests and family members for more than 15 years. Our R & D and Quality Control cycles continually improve our surveillance and access control products, making them easy to use for professionals and consumers alike.
